

Oleksandr Yeremenko

Cybersecurity/SOC Analyst

PROFILE

Results-driven specialist with a strong background in Software Development (Java, Python) and Smart Contract Security. Proven track record in Search Engine Reputation Management (SERM), successfully executing strategies to dominate search results and protect brand identity.

Expert at leveraging technical skills to automate SEO workflows, analyze large datasets, and optimize web architecture. Deeply familiar with the crypto ecosystem, including CEX/DEX mechanics and blockchain security audits (Bug Bounty experience). Highly adaptable, AI-literate, and committed to driving organic growth through a data-backed, technical approach.

EDUCATION

Dnipro Lyceum of Information Technologies

★ **Secondary Education Information** **Technology specialization**

Mar 2018 — Mar 2022

- Specialized in information technology, mathematics, and programming.
- Gained solid knowledge in computer science, algorithms, and database fundamentals.
- Participated in IT-related extracurricular activities, coding clubs, and competitions.
- Worked on team projects, including software development and problem-solving challenges.
- Graduated with strong academic performance and focus on technology-oriented studies.

Polish Japanese Academy — Warsaw

★ **Bachelor's degree** Oct 2022 — Present

- Pursuing a Bachelor's degree in Computer Science with a focus on software development, databases, and web technologies.
- Actively engaged in courses covering algorithms, data structures, object-oriented programming, and software engineering.
- Participating in academic projects and team assignments that simulate real-world IT workflows.
- Developing skills in Java, C#, React/Angular, and SQL as part of coursework and extracurricular projects.
- Involved in student tech communities and activities to expand practical knowledge and teamwork experience.

Skills

- **Languages:**
- **Java (Core, OOP)**
- **Python (Automation/Scraping)**
- **SQL**
- **.NET/C#.**
- **HTTP, DNS, SSH, FTP (TCP/UDP/IP)**
- **GitHub**
- **Jira**
- **Slack**
- **Splunk**
- **Windows/Unix**
- **Linux**
- **Powe BI**
- **AWS**

★ Software Development / Computer Science , IT Step Academy — Dnipro

Certificate Program Mar 2016 — Mar 2021

- Completed professional training in software development, databases, and computer networks.
- Learned programming languages (C#, Java, Python) and applied them in practical projects.
- Gained hands-on experience with web development, algorithms, and object-oriented programming.
- SERM and SERP
- Strengthened problem-solving, teamwork, and presentation skills through project-based learning.

EMPLOYMENT HISTORY

CRM Solutions

CRM Developer Intern —Odessa

Feb 2023 — May 2023

- Developed and optimized CRM applications using .NET, SQL, and Power BI.
- Collaborated with cross-functional teams to implement features, adhering to the software development lifecycle.
- Conducted rigorous testing and debugging to ensure application performance and reliability, reinforcing strong problem-solving skills.
- Participated in code reviews to enhance code quality and adherence to best practices, demonstrating a commitment to delivering high-quality solutions.

CUBE (Ukraine)

SOC analyst(Contract/Freelance)

Sep 2024 — Sep 2025

- 24/7 SOC Team Operations: Uczestniczenie w pracach zespołu SOC w systemie zmianowym 24/7 (Participated in 24/7 shift-based SOC operations), monitoring cloud and on-premise infrastructure.(Making alerts)
- Systems Operation: Obsługiwanie systemów wspomagających monitorowanie bezpieczeństwa środowisk teleinformatycznych (Operated security monitoring tools and SIEM platforms for IT environments).
- Incident Triage: Przyjmowanie i rejestrowanie zgłoszeń zdarzeń bezpieczeństwa. Responsible for initial categorization and prioritization of security alerts.
- First-Line Response: Reagowanie na incydenty, dokonywanie wstępnego wyjaśnienia oraz analizy przyczyn. Analyzed network protocols (TCP/IP, DNS, HTTP) and logs to identify root causes.
- L2 Support: Wspomaganie 2. linii wsparcia (Assisted L2 analysts) in complex investigations and threat mitigation.
- Cloud Security: Monitored and ensured the security of multicloud IT environments, specifically focusing on Google Cloud and Microsoft Azure infrastructures.

Neko Dev

Unity Software Developer — Warsaw

Feb 2024 — Aug 2024

- Developed interactive applications and gameplay mechanics in Unity (C#), demonstrating the ability to quickly learn new technologies and adapt to diverse development environments.
- Successfully applied Agile workflows and Git version control to manage code changes, ensuring collaborative team performance.
- Integrated various assets, APIs, and backend logic to ensure smooth performance across platforms.
- Actively participated in hackathons and competitions (including Women in Tech), gaining valuable experience in rapid prototyping, teamwork, and problem-solving under pressure—skills essential for AI research and experimentation.
- Conducted debugging and code reviews to maintain high code quality and stability.

Soft skills:

- Problem-Solving
- Critical Thinking
- Adaptability
- Teamwork
- Communication Skills
- Time Management
- Creativity
- Conflict Resolution
- Leadership Potential
- Attention to Detail
- Resilience
- Continuous Learning
